

Laser Dazzler-300 / Laser Dazzler-800

Eye-Safe Non-Lethal Deterrent Laser

The Laser Dazzler offers users a non-lethal deterrent, sending a clear message to opposing parties and crowds to halt their actions or face consequences. Its high-power 6-degree green laser beam is eye-safe and features three operation modes: constant, momentary, and strobe, each with corresponding LED indicators. The Laser Dazzler 300 provides effective warnings up to 400 meters, while the Laser Dazzler 800 extends its reach to 600 meters.

Military and Law Enforcement

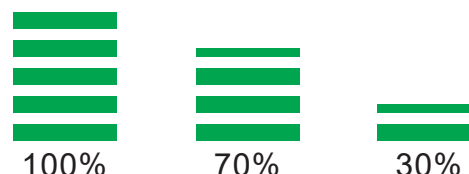

Applications:

- Law Enforcement: Used to control crowds, subdue suspects, and manage potentially volatile situations without resorting to lethal force.
- Military: Utilized in situations where non-lethal measures are preferred, such as checkpoint control, perimeter security, and deterring aggressive actions without escalation to lethal force.

High-power 6-degree green laser beam is eye-safe and features three operation modes: constant, momentary, and strobe.

Three different output power levels can be selected, 100%, 70% and 30%.

The main power switch, fire button, and front safety cover ensure safe operation and prevent accidental activation.

Clear indicators ensure intuitive operation.

	Preliminary Specifications	
	Laser Dazzler-300	Laser Dazzler-800
Laser	520nm, 300mW Class II laser product	520nm, 800mW Class IIIa laser product
Weight	300±20 g / 10.58±0.71oz	
Dimension (L*W*H)	230*37.2*40.6 mm / 9.06x1.46x1.59 inch	
Battery	2 x CR123A	
Indicators	Ready / Fire	
Operation mode	3 different mode:100%, 70 % and 30%
